

**Grade:** 2  
**Subject:** Science  
**Topic:** Human Body

This worksheet contains 6 multiple-choice questions about Human Body for Grade 2 Science students. Practice and test your understanding of key concepts. These Grade 2 science questions focus on basic human body parts and their functions. Students learn to identify the roles of the eyes (sight), nose (smell), skin (touch/heat sensation), teeth (chewing), legs (movement), and brain (sleep/rest). The questions reinforce vocabulary and build understanding of sensory organs and bodily systems.

---
