Grade: 1

Subject:Science

Topic: Plants

1. What part of the plant helps it soak up water from the soil?

- A) Roots
- B) Leaves
- C) Flower
- D) Stem

2. We planted two bean seeds. One seed was in a dark closet, and one was on a sunny windowsill. Which plant grew taller? Why?

- A) The plant in the dark closet, because it needed to reach for the light.
- B) The plant on the windowsill, because it got sunlight to make food.
- C) Both plants grew the same height.
- D) The plant in the dark closet, because it didn't need sunlight.

3. Maria noticed that her sunflower turned its face towards the sun throughout the day. What is this an example of?

- A) The sunflower is playing a game.
- B) The sunflower is thirsty.
- C) A plant's response to sunlight (phototropism).
- D) The sunflower is trying to find shade.
