Grade: 1

Subject: Science

Topic: Plants

1. What does a plant need to grow big and strong?

- A) Sunlight, water, and soil
- B) Only water
- C) Only sunlight
- D) Only soil
- 2. Maria planted two bean seeds. She gave one plant plenty of water and sunlight, and the other plant very little water and no sunlight. What did she probably observe?
- A) Both plants grew equally tall.
- B) The plant with plenty of water and sunlight grew taller.
- C) The plant with little water and no sunlight grew taller.
- D) Both plants died.
- 3. We planted sunflower seeds in two pots. One pot was placed in a sunny window, and the other was placed in a dark cupboard. After a week, the sunflower in the sunny window had sprouted, but the sunflower in the dark cupboard hadn't. What caused this difference?
- A) The cupboard was too small.
- B) Sunflowers need sunlight to start growing.
- C) The soil in the cupboard was better.
- D) Sunflowers only need water to grow.
